Free Windows ASP.Net hosting

Free web hosting on Windows 2016 and 2012R2. Supported features: IIS 8.5; ASP; ASP.Net 4.8/4.7/4.6/4.5/4.0/3.5/2.0; ASP.Net Core 2.2/3.1; MVC 1.0/2.0/3.0/4.0/5.0; PHP 5; MS SQL Express 2019/2016/2014/2012 and other standard components.

Free Windows web hosting with fast registration and free SSL certificates

This is an absolutely free Windows hosting offer. There is no credit card or other payment information required to pass the registration. We welcome people all around the globe to join our free web hosting offering. You'll find us the best choice for ASP.Net hosting, ASP, PHP hosting, MS SQL and Windows VPS hosting solutions. We will provide you with a free SSL certificate to secure website traffic. This is a valid global certificate accepted by the majority of web browsers.

Instant Hosting setup

You can get your free Windows hosting account up and running within the next few minutes. Try us risk free and start building powerful websites and save money at the same time.

Limitations and restrictions of the free web hosting package

In order to cover up the costs of hosting we insert a small advertisement on bottom of every page of your website. The ads are inserted automatically during web response and the source files are not modified. If you want hosting without advertisements please consider our paid [hosting packages](#). Restrictions: No adult, extremist or hate content. No hacking, illegal software distribution or phishing websites. We also do not tolerate hot linking and proxy website. Please read our [terms of service](#) for the list of all restrictions.

Keeping your site active

We have an automated verification system which checks if your free website or database is active. The websites are removed automatically if not visited once during last 30 days. MS SQL databases will be removed if not accessed once with SQL select, insert, update or delete commands during last 30 days. This does not apply to our [paid hosting](#).

Hosting plan: Hosting plan "Freebie"

⚠ Although your hosting plan supports global domains you still need to provide initial default domain name which is hosted within our zone. You will be able to add additional domains later in control panel.

Site name (Subdomain):

Zone name:

Operating system:

ASP.Net version:

Site title:

Site description:

ℹ Your site will have default domain names as 'Sub domain'. 'Zone name' and www.'Sub domain'. 'Zone name'. If supported by hosting plan, you can use your own domain names, registered with domain name registrar. DNS record will be created instantly, but because of DNS replication delay it may take up to 24 hours for your site to be visible to all users on the Internet. You can try to access your site right after it's created. If it's not working retry it every 30 minutes.

The process may take up to several minutes. Please be patient.

7. Aguarde até que o somee.com propague seu subdomínio nos servidores de DNS

The screenshot shows a web browser window with the URL `somee.com/DOKA/DOU/DOMP/DOWebSites/DOCreateWebSite.aspx?k1k3k5=IX%2fJwhfemIFP5VTrGZtv%2fXyrWS1nympanzgor1d7PV4%3d`. The page title is "Create website". The navigation bar includes "SOMEE.com", "User home", "Store", "System help", "Ask a question", and "Logout".

The main content area is titled "Create website" and displays the following information:

- You website was created successfully!**
- Information:** You can upload content of your web site with either FTP or built in file manager. If you'll use FTP – DO NOT upload files into a root directory. Upload your web content into subdirectory with a name of "www." + SiteName. For your convenience you can also use protected directory (named: "protected." + SiteName) to store files that you don't want to be directly accessible to users (ex: Database, configuration files..)
- Warning:** Because of DNS replication delay it may take up to 24 hours for your site to be visible to all users on the Internet. You can try to access your site right after it's created. If it's not working retry it every 30 minutes.
- [Manage website](#)

The left sidebar contains a "User menu" for "User (bazanaqui)" with various options such as "Create support ticket", "Support tickets", "Checkout", "SSL Certificates", "Account", "Password change", "Addresses", "Payment methods", "Invoices", "Billing options", "Active packages", "Managed products", "Virtual servers", "Websites", "MS SQL", "Databases", "Logins", "Email", "Add new mail domain", "Mail domains", and "Backup locations".

The Windows taskbar at the bottom shows the search bar with the text "Digite aqui para pesquisar", the system tray with the time "16:46" and date "26/09/2020", and the copyright notice "© Copyright 2020 Doka management panel".

8. Entre com seus dados de login.

painel de controle >> Managed products >> website >> seu subdominio >> File manager;

The screenshot shows a web browser window with the address bar displaying the URL: `somee.com/DOKA/DOU/DOMP/DOWebSites/DOSiteFileManager.aspx?k1k3k5=IX%2fJwhfemIFP5VTrGZtv%2fXyrWS1nympanzgor1d7PV4%3d`. The page title is "File manager".

The interface includes a navigation menu on the left with categories like "User menu", "Account", "Managed products", "Websites", "MS SQL", and "Email". The "Managed products" section is expanded to show "Virtual servers" and "Websites". Under "Websites", the site "barbarazanaqui.somee.com" is selected, and the "File manager" option is highlighted.

The main content area, titled "File manager", shows the site path: "Site: barbarazanaqui.somee.com". It features a toolbar with icons for Root, Up, Cut, Paste, New dir, New page, Delete, Refresh, Reverse, and Upload. The status bar indicates: "Action: Launched...", "Dir(s): 0 | File(s): 1 | Total: 8 KB", and "Current path:". Below this is a table listing files:

<input type="checkbox"/>	File name	Size	Last modified	
<input checked="" type="checkbox"/>	default.asp	8 KB	26/09/2020 14:46:13	Edit text Edit HTML

At the bottom right of the page, there is a copyright notice: "© Copyright 2020 Doka management panel".

9. Transferência dos arquivos via protocolo FTP.

The screenshot shows the FileZilla interface. The top menu bar includes 'Arquivo', 'Editar', 'Ver', 'Transferir', 'Servidor', 'Marcadores', and 'Ajuda'. Below the menu is a toolbar with various icons. The main interface is divided into several sections:

- Hosts:** Fields for 'Host:', 'Nome de usuário:', 'Senha:', and 'Porta:'. A 'Conexão rápida' dropdown menu is also present.
- Endereço local:** A dropdown menu showing the path: `.\Fatec\+DISCIPLINAS\+AULAS\2021-2\SI\Noite\Projetos\Projeto2\Projeto2\`. Below this is a tree view showing folders: 'packages', 'Projeto2', and 'Tarefas'.
- Endereço remoto:** A dropdown menu that is currently empty.
- Local File List:** A list of files and folders in the local directory. The status bar below indicates '15 arquivos e 5 pastas. Tamanho: 29.143 bytes'.
